

CHRISTIAN DADZIE

(203) 821-1722 | New Haven, CT | christiandadzie.q@gmail.com | [LinkedIn](#) | [Website](#)

EDUCATION

Yale School of the Environment

New Haven, CT

Master of Environmental Management, Energy Specialization

August 2023 – May 2025

Three Cairns Scholar (inaugural 2023 cohort) | Bekenstein Climate Fellow (inaugural 2024 cohort)

Kwame Nkrumah University of Science and Technology

Accra, Ghana

BSc Petroleum Engineering

September 2015 – July 2019

First Class Honors | Provost's Engineering Excellence Award

CORE COMPETENCIES

Energy Market Analysis | Utility Operations | Energy Storage | Sustainability Strategy | Decarbonization Analysis | GHG Accounting | Data Analysis: Python, R, Excel | Geospatial Analysis: ArcGIS Pro | Stakeholder Engagement

EXPERIENCE

King Energy

Remote

Utility Specialist

February 2026 – Present

- Evaluate customer tariffs and coordinate favorable tariff changes with major California utilities to support project economics and portfolio revenue performance
- Manage the end-to-end tenant and utility onboarding process across more than 200 distributed solar programs, coordinating authorization approvals, utility account setup, and Virtual Net Energy Metering submissions
- Identify and resolve meter data and solar credit allocation issues across tenant accounts, accelerating activation while improving portfolio accuracy and revenue capture

Renewable Energy Analyst

December 2025 – January 2026

- Developed King Energy's 2025 operational GHG emissions profile across Scope 1–3 to support sustainability reporting and internal emissions tracking
- Resolved meter misallocations across tenant accounts to improve solar credit accuracy and portfolio-level energy data

BrandSafway

Remote

EDF Climate Corps Fellow, ESG Analyst

July 2025 – September 2025

- Quantified \$1.5 million in avoidable fleet costs and 3,500 tons of avoidable CO₂ emissions by analyzing the impacts of idling, harsh driving, and speeding across BrandSafway's North American fleet
- Developed regional fleet performance profiles that identified operational hotspots and presented recommendations to equity partners and EHS leadership, directly informing targeted driver interventions across high-impact regions
- Synthesized behavioral, organizational, and technology findings into a phased fleet decarbonization roadmap for BrandSafway's North American operations

Avangrid / Yale Center for Business and the Environment

New Haven, CT

Graduate Consultant

August 2024 – December 2024

- Evaluated four battery technologies (LFP, NMC, flow battery, iron-air) across seven states, analyzing interconnection queue dynamics across New England (ISO-NE) and New York (NYISO), utility pricing, and state policy environments
- Identified LFP short-duration storage as the strongest near-term market-entry option based on supply-chain maturity and state-level storage mandates in Maine and New York

Connecticut Department of Energy and Environmental Protection
Summer Fellow, Bureau of Energy and Technology Policy

New Britain, CT
 May 2024 – August 2024

- Built an Excel-based model to forecast energy demand and electrification pathways across more than 40 state agencies, incorporating solar, efficiency, and electric-vehicle targets
- Assessed whether existing programs were sufficient to support Connecticut's 2030 climate goals and established a baseline for tracking future performance

Pecan Energies Ghana Limited
Trainee Operations Engineer

Accra, Ghana
 March 2021 – December 2022

- Developed the operations philosophy and logistics OPEX model underpinning the \$4.4B Pecan deepwater oilfield development economics
- Translated Ghana's amended Petroleum Local Content Regulations (LI 2435) into practical sourcing, contracting, and supply chain implications for the Pecan development project

SELECTED ANALYTICAL PROJECTS

Energy Equity & Solar Potential Analysis | Python

Spring 2025

Identified where targeted solar investment could deliver the greatest equity impact by clustering U.S. counties based on energy burden, solar potential, income and race

Methane Flux Prediction, Okavango Delta | R

Fall 2024

Predicted spatial patterns of wetland methane emissions across the Okavango Delta by training a random forest model on global wetland flux-monitoring data

Solar Site Suitability Modeling, Chicago | ArcGIS Pro

Fall 2024

Identified priority areas for equitable solar development in Chicago by combining electricity demand, socioeconomic hardship, and land-use data

LEADERSHIP

Yale School of the Environment

New Haven, CT

Co-Lead, Energy Student Interest Group

January 2024 – January 2025

Expanded student engagement with the energy sector by organizing internship panels, alumni networking events, and a low-carbon building materials panel for the Yale Clean Energy Conference

Teaching Fellow, Physical Science Foundations

Fall 2024

Supported graduate students from varied technical backgrounds through weekly office hours in physical science fundamentals
